MAYANK MANISH PANDEY, CAPM

Los Angeles, CA | (213) 831-7998 | pandeym@usc.edu | linkedin.com/in/mayank-manish-pandey

SUMMARY

M.S. Engineering Management candidate at USC (Expected May 2027) with hands-on project delivery across engineering, operations, and technical teams. Managed a $2.1M HVAC project at 98% on-time delivery across 35 suppliers and 20+ purchase orders; launched a cross-functional website 10 days early and on budget; shipped embedded hardware in 2 months.

EDUCATION

University of Southern California (USC Viterbi) | M.S. Engineering Management **Expected May 2027**

Graduate Certificate in Optimization and Supply Chain Management | GPA: 3.50 | Relevant: Engineering Project Management, Systems Integration, Leading & Managing Engineering Teams

B.Tech, Electronics and Communication Engineering | Manipal University Jaipur | GPA: 3.42/4.00 **2020 - 2024**

PROFESSIONAL EXPERIENCE

Quality Analyst **January 2026 - Present**

USC Financial and Business Services / ANTWORKS | Financial operations *Los Angeles, CA*

- Helped reduce daily processing errors ~25% across 200-300 transactions by analyzing recurring exception patterns across 2 integrated systems and partnering with engineering and operations on workflow fixes.
- Improved accountability across 200-300 daily transactions by standardizing issue ownership, escalation, and resolution tracking and following open actions through closure.

Founder & Operations Lead **July 2024 - July 2025**

Kiravi Lifestyle | E-commerce fulfillment & supplier operations *Remote*

- Built a 30+ supplier network from 50+ vendor evaluations, comparing cost, lead time, product fit, and reliability while negotiating drop-ship and prepay-and-hold arrangements.
- Cut dispatch time 35% within 2 weeks and reduced stockouts ~30% over the following months across ~60 monthly orders by redesigning fulfillment with 30+ suppliers around a vendor-managed drop-ship model.
- Recovered ~34% of procurement cost on aging inventory by analyzing sell-through, prioritizing deadstock, and executing a targeted clearance campaign while balancing supplier and fulfillment priorities.

Assistant Project Manager **July 2024 - February 2025**

Midway Comforts | HVAC project delivery & commercial operations *Mumbai, India*

- Maintained 98% on-time delivery on a $2.1M HVAC installation by tracking schedule, budget, milestones, and risks while coordinating engineering, procurement, 35 suppliers, site teams, and 20+ purchase orders.
- Reduced material cost 11% and helped win the $2.1M contract by analyzing BOQ costs and supplier pricing, moving the company from the third-highest-cost dealer to the lowest-cost bid before execution.
- Delivered a company website launch 10 days early and on budget, increasing customer reach ~25% and contributing to 3 hires, by building the WBS in Microsoft Project, tracking execution in Jira, and leading weekly reviews with 8-9 department leads.

Sales & Marketing Trainee **January 2024 - June 2024**

Secure Meters Ltd. | Electrical metering & HVAC controls *Mumbai, India*

- Executed pre-launch GTM work for a new HVAC-control product by defining target customers through 70+ field engagements, refining positioning, coordinating 3 product demos, and helping convert 1 demo into a ~50-unit order.
- Informed launch strategy and contributed to ~5% regional sales growth by synthesizing customer requirements, competitor pricing, delivery expectations, and field feedback into a market-entry report for regional leadership.

Embedded Systems Intern **May 2023 - July 2023**

Solus Security Systems | Embedded security hardware *Bangalore, India*

- Shipped a production-ready smart-locker product in 2 months by owning prototype development, firmware integration, production hardware validation, troubleshooting, and deployment under a fixed delivery schedule.
- Resolved integration issues across 3 core technical elements - RFID authentication, DWIN DGUS touchscreen HMI, and Embedded C firmware - by validating production hardware and debugging failures before deployment.

PROJECTS

AI Product Builder | StockBridge | USC Marshall AI Product Showdown (3rd/15 teams) **Oct 2026**

- Built a working agentic AI inventory prototype for a 300-SKU catalog across 2 regions and 6 channels, consolidating messy stocklist ingestion, SKU matching, demand forecasting, order recommendations, receiving, and human-approved marketplace updates.
- Designed a human-in-the-loop matching and exception workflow using UPC, model code, title similarity, and Claude only for unclear lines; matched 290/400 rows (72.5%) without AI and flagged 110 for review.
- Built a business case with a modeled 2.9x conservative payback and delivered a 5-minute pitch with a 90-second live demo as part of a 4-person team, placing 3rd of 15 teams across all tracks.

Technical Project Manager | SpotDrop **2026**

- Structured a 5-phase technical project across 4 workstreams by translating a 20+ page PRD into a WBS, RACI, risk register, Jira/Microsoft Project schedule, and milestone/dependency tracking.
- Created execution clarity across 4 workstreams by producing architecture diagrams and an interactive prototype to test and refine requirements, clarify scope and technical dependencies, and define launch decision points and success metrics.

Project Risk & Governance Analyst | Hydro One Smart Metering Program **2026**

- Built a program risk framework around case scenarios including a 6-month delay with ~$20-30M impact and ~$30-40M satellite-connectivity exposure, assigning risk owners, mitigations, monitoring actions, and escalation paths.
- Designed a 2-level governance cadence with weekly leadership reviews and monthly steering reviews using KPI/RAG monitoring, vendor scorecards, and EVM-style status tracking to surface schedule, cost, and vendor risk.

SKILLS

Project Planning & Controls: project lifecycle, scope/SOWs, requirements, project plans, WBS, RACI, schedule/milestone tracking, dependency management, risk/issue tracking, budget/cost tracking, project documentation

Stakeholders & Execution: status/leadership reporting, action-item follow-up, meeting facilitation, vendor/site coordination, RFQs, purchase orders, logistics, cross-functional stakeholder alignment, launch/GTM planning, process improvement, root-cause analysis, DMAIC

Tools & Technical: Microsoft 365 (Excel, PowerPoint, Word, Outlook), Microsoft Project, Smartsheet, Jira, Confluence, SQL, Python, Tableau, Power BI, JavaScript, Embedded C, Claude/LLM tools
